BLS/CETA/MR-80/08

A Report on Comprehensive Employment and Training Act  
Prime Sponsors and Program Agents

This publication includes provisional estimates of the labor force, employment and unemployment for prime sponsors (PS) and program agents (PA) under the Comprehensive Employment and Training Act of 1973 as amended (CETA). A prime sponsor is generally defined as a State or unit of general local government serving an area of 100,000 or more inhabitants, or combination of areas including such units. A program agent is a unit of general local government within a prime sponsor area with at least 50,000 inhabitants.

The data that follow are published in accordance with the requirements of Directives No. 4 and 11 issued by the Office of Federal Statistical Policy of the U.S. Department of Commerce. The estimates are the product of a Federal - State cooperative program in which State employment security agencies prepare labor force and unemployment estimates under concepts, definitions, and technical procedures established by the Bureau of Labor Statistics (BLS).

The national unemployment statistics published monthly by the BLS are obtained from the Current Population Survey (CPS), a survey of households. However, except in 10 large States and two large areas, the size of the current CPS sample is not sufficient to obtain reliable monthly State and area estimates. Therefore, statistics derived from State unemployment insurance (UI) operations, as well as adjustment factors based on data from the CPS and other sources, are used to calculate estimates for most States and local areas.

In 10 of the largest States (California, Florida, Illinois, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, and Texas), and two areas (New York City and the Los Angeles-Long Beach metropolitan area), the monthly estimates are taken directly from the CPS. These State and area estimates meet BLS standards of reliability (10 percent coefficient of variation at a 6 percent rate of unemployment). In the remaining 40 States and the District of Columbia, a 6-month moving average adjustment (using CPS and UI-based data for the State) is applied to the UI-based estimate to bring the State estimates into conformity with national definitions of employment and unemployment. Estimates for the labor market areas (except for the Los Angeles-Long Beach area) are obtained from the UI-based estimates adjusted to the State total for employment and unemployment. Estimates for counties and cities (except for New York City) within labor market areas (LMA's) are obtained by disaggregation of the LMA employment and unemployment estimates, using recent population and UI claims data where available, or relationships from the 1970 Census of Population.

Once each year, the monthly employment and unemployment estimates for the 10 large States and two large areas are revised to new population controls. The UI-based estimates in the remaining States and the District of Columbia are adjusted or "benchmarked" to annual averages obtained from the CPS. Estimates for areas within the State are then adjusted so that the sum of the sub-State components add to the Statewide totals. The estimates in this report are provisional and will be revised in March 1980 to new population controls and/or benchmarks from the CPS. A fuller explanation of the technical procedures used to develop the estimates and of the benchmarking process appears monthly in Explanatory Note for State and area unemployment data in the BLS periodical, "Employment and Earnings".

Appendix A of this report provides labor force and unemployment estimates used to administer certain special provisions of the 1978 amendments to the CETA Act. The estimates in Appendix A do not replace the official estimates developed as part of the Federal-State cooperative program.

Because of the small size of many of the areas, as well as the limitations of the data inputs, these estimates are subject to considerable statistical error. Readers are cautioned that the data have been developed solely to satisfy a program need under CETA and should not be used for time series analysis.

The labor force estimates for prime sponsors are arranged alphabetically by State with each program agent listed following the prime sponsor of which it is a component. Microfiche or these data is organized in lettered rows and numbered columns, and reads from top to bottom. An index appears in the lower right hand portion of each fiche.

Additional copies of this publication in either microform or print, may be ordered from: National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Va. 22161. When ordering additional copies please specify microform or printed copy, and indicate the number of the report.

Appendix A. Supplementary Estimates for Areas Required by Sections 202, 233, and 604 of the Comprehensive Employment and Training Act and Defense Manpower Policy No.4A

This appendix includes estimates of the labor force, employment, and unemployment for prime sponsors (PS), program agents (PA), and areas of substantial unemployment (SU) under CETA, and also for other units of local government within the Standard Metropolitan Statistical Areas (SMSA's) and central cities for which the Current Population Survey (CPS) was used to determine annual unemployment data prior to January 1, 1978.

These are supplementary estimates for areas as required by Section 202, 233, and 604 of CETA and Defense Manpower Policy No.4A. They do not replace the official estimates published as part of the Federal - State cooperative program.

The labor force estimates for SMSA's, Counties and Cities are arranged alphabetically by State. The microfiche is organized in lettered rows and numbered columns, and reads from top to bottom. An index appears in the lower right hand portion of each fiche.

Additional copies of this publication in either microform or print, may be ordered from: National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Va 22161. When ordering additional copies please specify microform or printed copy, and indicate the number of the report.
